

Supplement to

ANNALS OF SURGERY

Vol. 160

August 1964

No. 2

C O N T E N T S

- 9 **Chapter I** Introduction
- 11 **Chapter II** Ultraviolet Radiation in the Operating Room: A Historical Review
- 14 Clinical Studies
- 16 Atmospheric Bacterial Flora
- 16 Injurious Effects of Ultraviolet Radiation
- 19 **Chapter III** Organization, Methods, and Physical Factors of the Study
- 19 Organization and Methods
- 21 Evaluation of Infection
- 23 Wound Classification
- 24 Physical Factors of Ultraviolet Radiation in the Operating Rooms
- 30 Problems Encountered During the Study
- 32 **Chapter IV** Factors Influencing the Incidence of Wound Infection
- 32 Ultraviolet Irradiation of the Operating Room
- 33 Results of Air Sampling
- 34 Clinical Results
- 38 Risk of Infection and Irradiation Effect
- 39 Intensity of Ultraviolet Irradiation
- 40 Febrile Response
- 41 Other Variables and Irradiation Effect
- 43 Type of Operation
- 44 Bacterial Contamination of Wound
- 47 General Patient Factors
- 47 Age
- 51 Sex
- 52 Race
- 53 Metabolism and Nutrition
- 58 Remote Infection

60	Local Wound Factors
60	Closure
62	Drains
64	Other Operative Factors
64	Duration of Operation
66	Urgency of Operation
67	Time of Operation
69	Month of Operation
71	Preoperative and Postoperative Factors
71	Duration of Preoperative Hospitalization
74	Prophylactic Antibiotics
78	Summary of Clinical Observations
82	Chapter V Bacteriologic Studies
83	Bacteriologic Survey of Personnel
86	Bacteriologic Survey of Operating-Room Air
90	Bacteriologic Survey of Wounds Cultured at Time of Operation
92	Summary of Organisms Recovered
93	Frequency of Organisms Cultured From Wounds Became Infected
94	Frequency of Organisms Recovered From Cultures of Clean, Clean-Contaminated, Contaminated, and Dirty Wounds
97	Frequency of Organisms Recovered From Cultures by Wound Classification and Postoperative Infection Status
99	Effect of Ultraviolet Irradiation on Frequency of Organisms Recovered From Wounds
99	Phage Patterns of <i>Staphylococcus aureus</i> Isolated From Wound Cultures
100	Comparison of Bacterial Flora at Time of Operation With Flora of Postoperative Drainage of Wounds That Developed Infection
102	Bacteriologic Survey of Postoperative Wound Drainage
102	Frequency of Organisms Recovered From Postoperative Wound Drainage
103	Relationship of Recovery of Various Organisms and Postoperative Infection
106	Relationship of Recovery of Various Organisms and Wound Classification
107	Relationship of Recovery of Various Organisms From Drainage and Ultraviolet Irradiation
110	Phage Patterns of Coagulase-Positive Staphylococci Recovered From Postoperative Wound Drainage
114	Chapter VI Epidemiological Considerations
123	Discussion
125	Chapter VII Summary
126	Bibliography
133	Appendix A Forms Used in Collecting Data
145	Appendix B Detailed Data on Incidence of Surgical Wound Infection
179	Appendix C Standard Bacteriologic Methods
181	Appendix D Detailed Bacteriologic Data
